

Initial Remote Deposit Capture Machine Setup

Setup and connect the Remote Deposit Capture Machine to the computer.

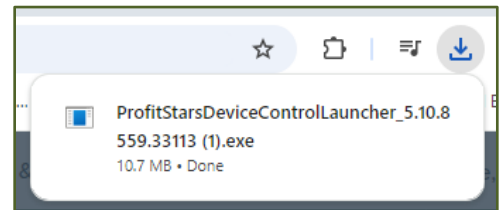

- To get started, select **Business RDC** from the dashboard.
- Go to **Transactions > Remote Deposit Complete > Create New Deposit**

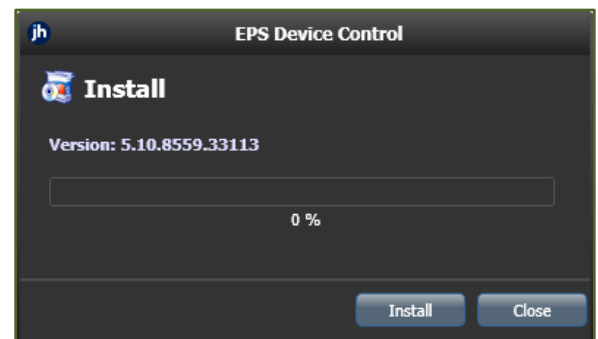

- *Getting Started with a Check Scanner* pop up box will display, select **Download Device Control**.

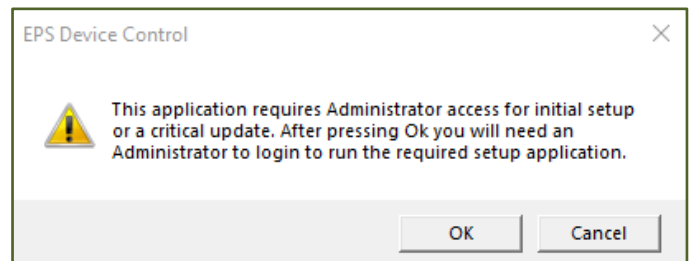

- Select the downloaded file, **ProfitStarsDeviceControlLauncher**.

- A *EPS Device Control* box will display, select **Install**.

- A *EPS Device Control* alert will display, select **OK**.

NOTE: A systems administrator may be needed from your organization. This will most likely be someone in the organizations IT/Technology department. They will need to allow the Profit Stars Device Control program to be downloaded on the computer.

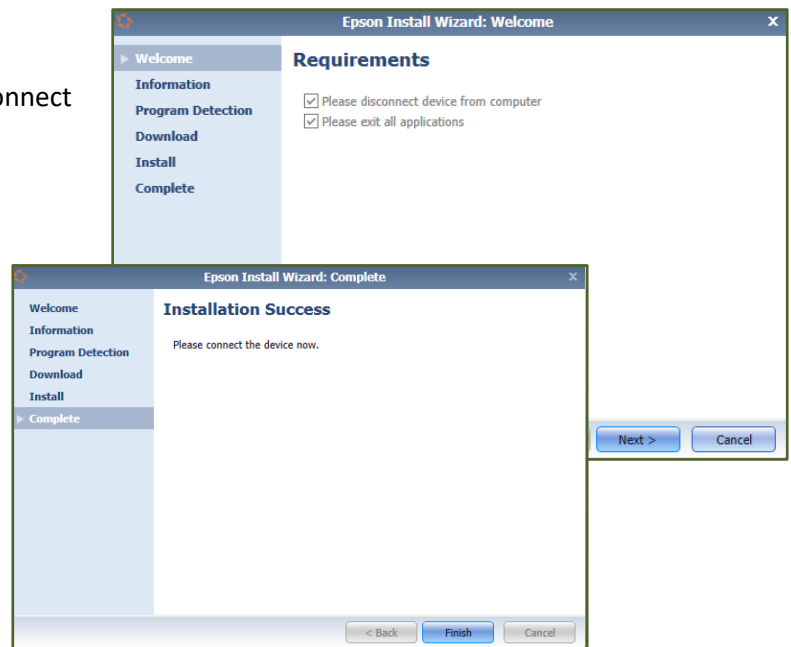

- Choose a Device Manufacturer box will display. From the **Select Manufacturer** drop down box, choose **Epson**.

- From the *Add/Remove Devices* box, choose **Epson** and click **Install**.

- The *Epson Install Wizard* box will display. Disconnect the scanner and select **Next**.
- Continue selecting **Next** until the *Complete/Installation Success* screen is reached.
- Reconnect the scanner to the computer and select **Finish**.

- Close the *Add/Remove Devices* box.
- Confirm you see a **Scanner Terminal Number** on the *Create New Deposit* page. Once confirmed, the machine is ready to start making deposits!
